Applicants are enclosing Form PTO-1449 (two-sheets), along with a copy of each listed reference (A24 – A41) for which a copy is required under 37 C.F.R. §1.98(a)(2).

As each of the listed references is in English, no further commentary is believed to be necessary, pursuant to 37 C.F.R. §1.98(a)(3). Applicants respectfully request the Examiner's consideration of the above references and entry thereof into the record of this application.

The present application is directly or indirectly related to a patent asserted during the course of Square D Company v. E.I. Electronics, Inc. Case No. (N.D. Ill. 1:06-cv-05079). Applicants are including a copy of the Amended Counterclaims of EI Electronic, Inc. and EI Electronics LLC (hereinafter, "Amended Counterclaims"), which was filed during the above-referenced litigation, as Appendix A. Paragraph 32 through paragraph 37 of the Amended Counterclaims allege that United States Patent No. 7,415,368 (hereinafter, "the '368 patent") is unenforceable due to inequitable conduct for failing to disclose the Powerlogic ® Series 4000 Circuit Monitor (hereinafter, "CM 4000 monitor") and the Powerlogic ® Ethernet Communications Card (hereinafter, "ECC 21 communications card") to the U.S. Patent and Trademark Office during prosecution of the '368 patent. The '368 patent is owned by the Applicants. The ECC 21, which was available at least as early as July 20, 2000, was designed for use with the CM 4000 meter, both of which were manufactured by the Applicants in Palatine, Illinois, the features of which are evidenced by the references cited herewith.

Pursuant to 37 C.F.R. §1.56, Applicants hereby make of record in the present application the existence of the currently cited U.S. Patent No. 7,447,762 ("the '762 patent"), which is owned by the Applicants. Since the specifications and possibly the claims may include common or significantly related subject matter, Applicants respectfully request the Examiner to review the claims and the prosecution history, including any Office Actions issued by the U.S. Patent and Trademark Office, for the '762 patent. In particular, the Examiner is respectfully requested to carefully review the following actions from the '762 patent prosecution history:
